OFFICE ACTION

Claim Objections

Claim 1 is objected to because of the following informalities: ‘an internal combustion engine with a laser ignition device, comprising a Q-switched, pumped solid-state laser’ should be corrected to “a Q-switched, pumped solid state laser for a laser ignition device of an internal combustion engine, comprising”.

Claim 60 is objected to because of the following informalities: ‘the heat dissipater’ should be “a heat dissipater”.

Claim 68 is objected to because of the following informalities: ‘the inner coolant’ should be “an inner coolant”.

Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 32, 34-35, 37, 39-48, 54-61, 64, 70, and 72-73 are rejected under 35

U.S.C. 102(b) as being anticipated by Muncheryan (4979180).

Claims 32, 34-35, 37, 39-48, 54-61, 64, 70, and 72-73, Fig.4 and col.2, l.51-68 and col.3, l.1-18 disclose an internal combustion engine with a laser ignition device, comprising a Q-switched, pumped solid-state laser with a pulsed pumped light source 58, a solid laser crystal 59 embedded in a resonator, a Q-switch 65 for increasing the power density, at least one output mirror 64 and a focusing device 66, by means of which the laser beam may be focused in a combustion chamber, wherein the pumped light source, resonator plus laser crystal, Q-switch, output mirror, focusing device and a cooling device (two different cooling systems: Peltier and heatsink) for cooling the resonator are integrated in a single component which can be inserted into a spark-plug shaft.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 33 and 71 are rejected under 35 U.S.C. 103(a) as being unpatentable over Muncheryan (4979180) in view of US2007/0121689. Muncheryan disclose all limitations of the claims except for the passive Q-switching.

US2007/0121689 teaches the passive Q-switching in para.0075.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide Muncheryan what is taught by US2007/0121689 to use either the passive or active Q-switching.

Allowable Subject Matter

Claims 36, 38, 49-50, 53, 62, 65, 68-69 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. The above prior art fail to disclose the limitations as recited in the claims.

Claims 51-52, 63-64, 66-67 are also found objected due to their dependency of above claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US6347101.
